

Keyline Technologies — Employee Onboarding Policy

Classification: INTERNAL • Access: All Employees

1. Purpose

- This policy defines the standard onboarding process for newly hired employees.
- The goal is to ensure every employee receives required access, training, and organizational information.

2. Day One Checklist

- Complete identity and employment verification.
- Receive company email and approved collaboration tools.
- Complete information-security awareness training.
- Meet the assigned manager and team.

3. First Two Weeks

- Complete role-specific training.
- Review the Employee Handbook and applicable team procedures.
- Meet key stakeholders and understand project responsibilities.
- Confirm that required software and development environments are working.

4. Access Requests

- Access must follow the principle of least privilege.
- Managers approve role-specific access requests.
- Administrative or sensitive access requires additional authorization.

5. Onboarding Owner

- The People Operations team coordinates onboarding.
- The employee's manager is responsible for role-specific orientation.
